## Series VAR is an IBM Premier Business Partner

**We meet IBM's highest standards  
for technical certifications and  
customer satisfaction.**

- **#1** Provider of iSeries hardware and maintenance to McKesson's Series 2000™ users
- Specializing exclusively in the Series 2000 application environment, Series 2000 users are our only customers!!
- Develop custom solutions and integrate new technology to help you solve problems
- Healthcare Expertise with Series 2000 Hospitals

**“In the Series application there are thousands of files. Series VAR has worked with McKesson; they know the file names, file structure and where any potential problems would be. If we had gone with another vendor, we would have had to spend months teaching them the file structure and layout. With Series VAR, we were up and running in a week.”**

Marty Stewart  
Disaster Recovery Manager  
Anderson Area Medical Center, SC

We understand that your applications are the lifeline of your operation. That's why we strictly specialize in your McKesson Series 2000 environment. This gives you a business partner with a superior level of technical expertise – a solutions integrator that understands the importance of getting your applications up and running, not just your box.

We have hundreds of customer references - ask us for one near you or visit the *Customer References* section of our website!
